
U0 | observation 0 | training seed 2610131 | reference: PASS (empirical)
y = [2.05, 1.22, -0.227], sigma = 0.25, kappa = 0
Cached-grid reference density
Material coordinate x2
Material coordinate x1
Density in material coordinates
M-MDN: 1024 iid q draws
M-Y: 1024 iid q draws
M-S: 1024 iid q draws
M-R: 1024 iid q draws
Material coordinate x1
Same frozen observation/context in every model. New iid diagnostic draws; no residual selection.
Axes at zero define offline coordinate-sign events. Density values are not point probabilities.
